

HARD BINDING COVER GUIDE

(MECHANICAL STITCH)

The total size of your cover will be determined by the width & height of your pages + the spine.

Once we have printed your inner pages we will provide you with the dimensions for your cover, this will need to be sent to us as a single spread (PDF).

20mm Turn in

"Turn in" is the area that will be wrapped around the boards of your cover. You can extend any background artwork into the turn in but it will not be visible on the outer cover.

10mm Safe Area & 19mm Hinge Area

We recommend keeping any text or important artwork outside of these safe zones.
