

PERFECT BINDING COVER GUIDE

The total size of your cover will be determined by the width & height of your pages + the spine.

Once we have printed your inner pages we will provide you with the dimensions for your cover, this will need to be sent to us as a single spread (PDF) that can be printed and wrapped around your book block.

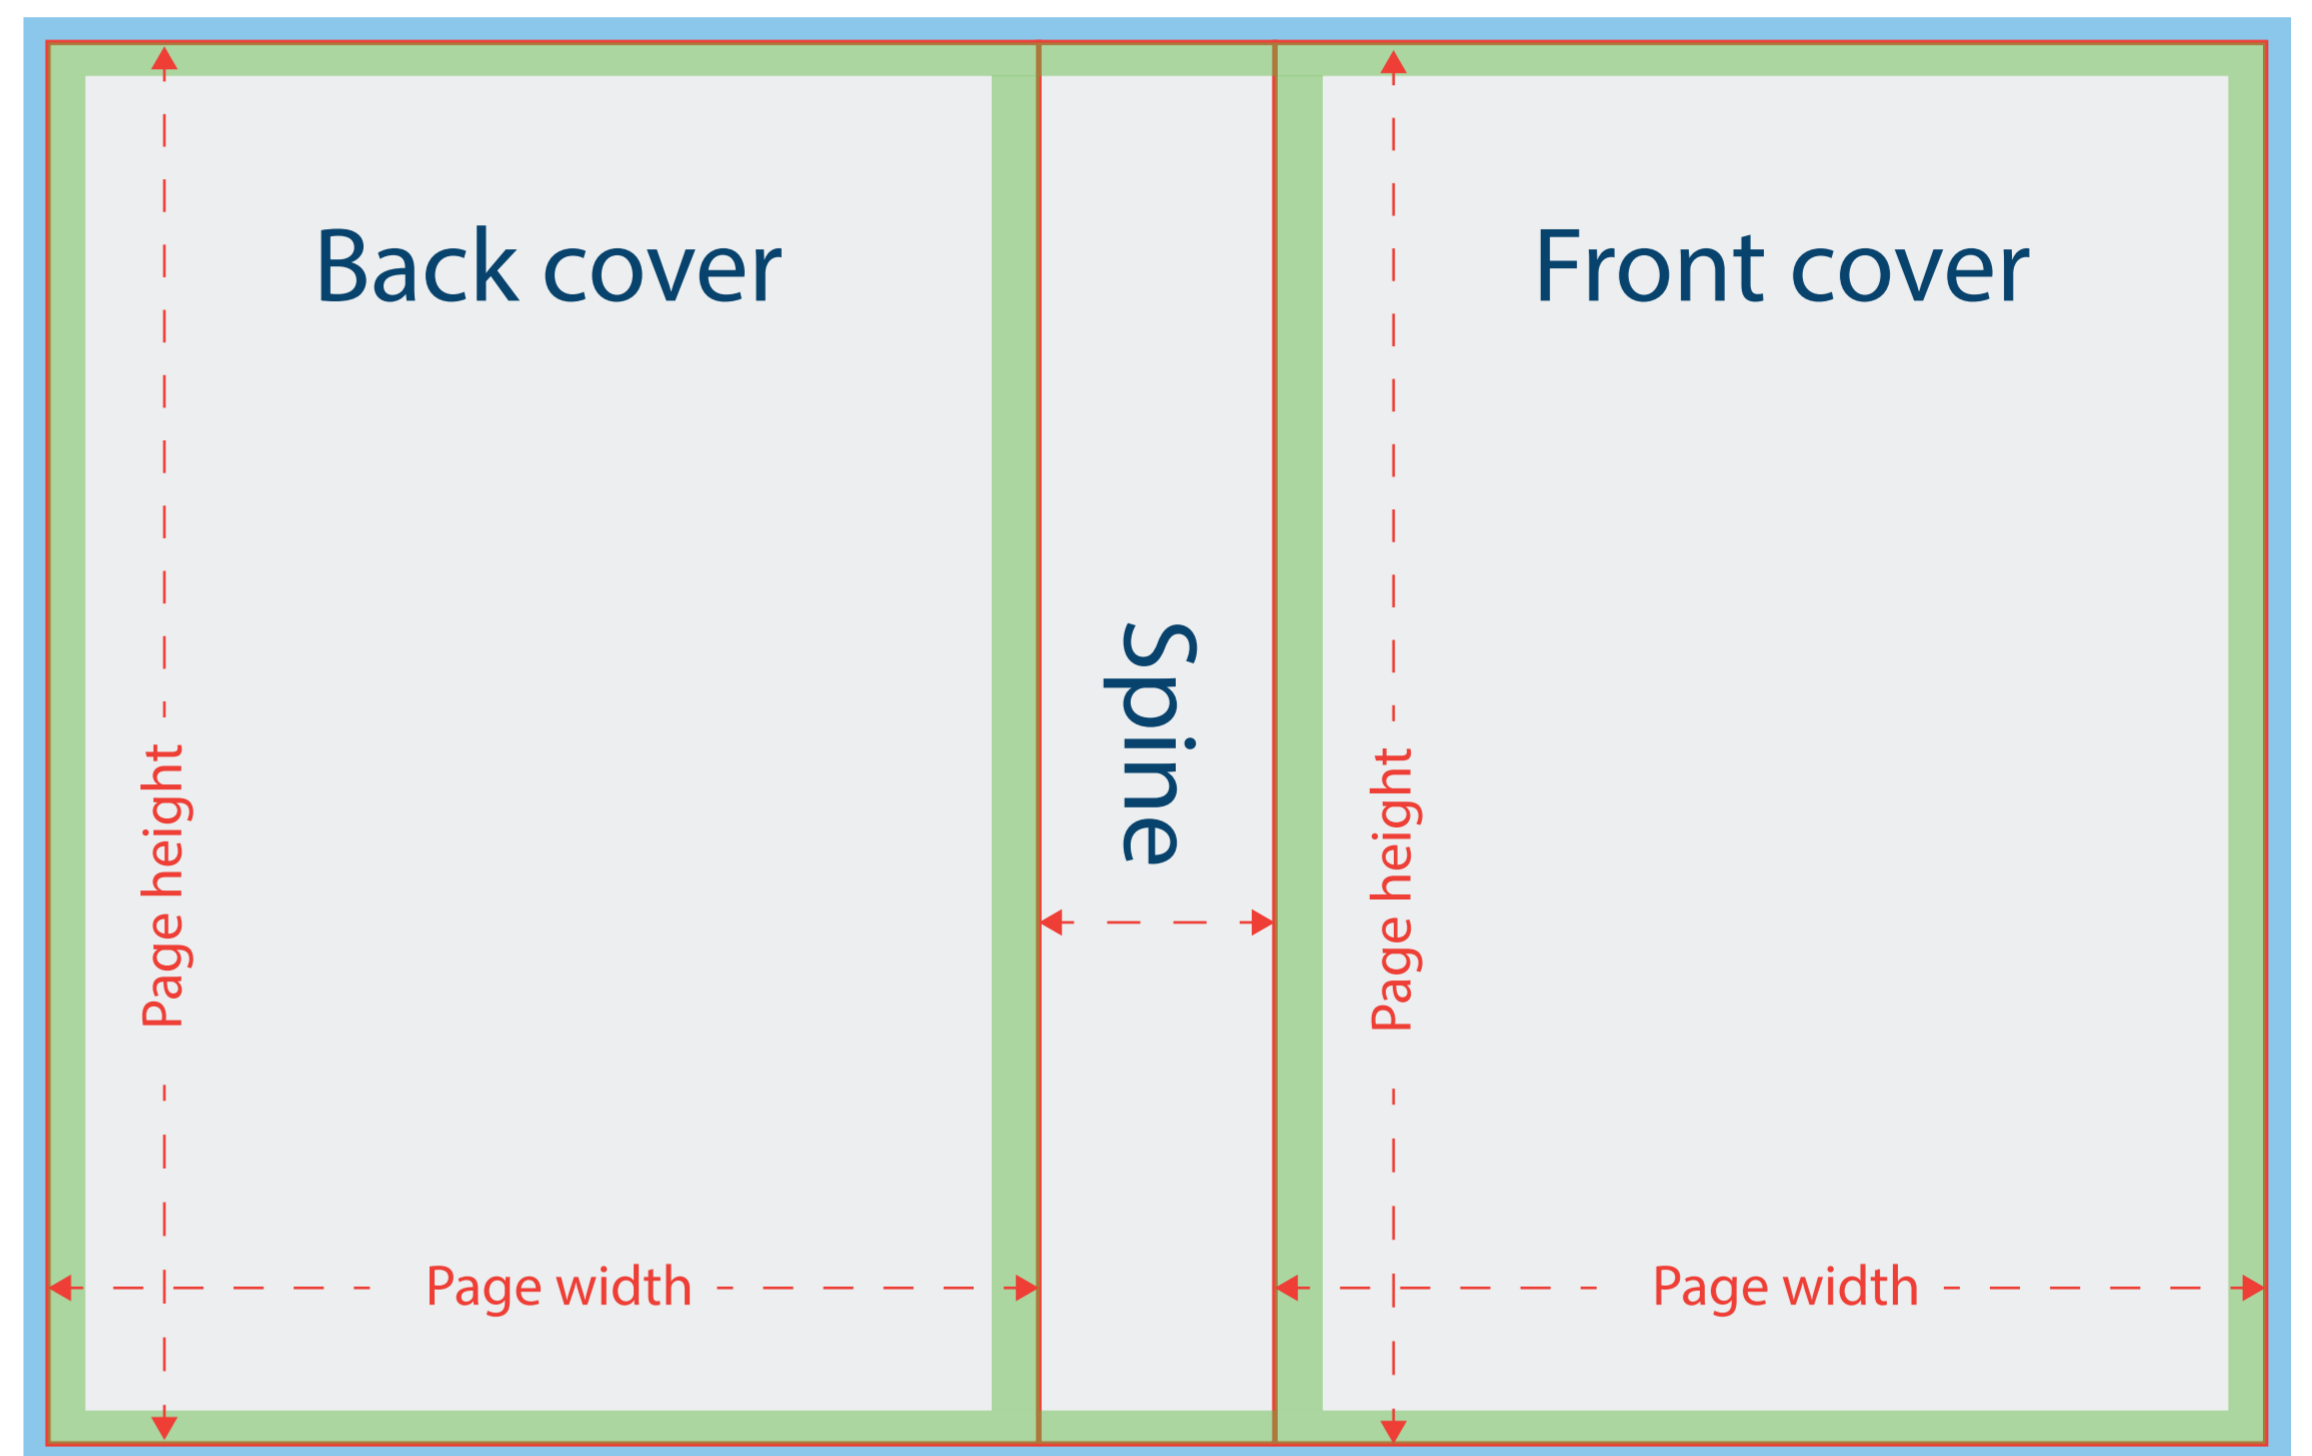

Please see example below -

3mm Bleed Area

"Bleed" is the area that will be trimmed off after the cover is printed and cut down to the finished size. Fill the background image (if you have one) to the bleed area.

10mm Safe Area

We recommend keeping any page numbers, text etc... 10mm away from the edges of your cover and both sides of the spine.

Side 2 (Double sided cover only)

Binding area

"Binding area" is the area that needs to be taken into account for binding.

You must leave the spine width + an additional 10mm both sides completely blank for binding purposes.
